

Mar-Kov Computer Systems Launches Chameleon Warehouse Management Systems Website

Chameleon Warehouse Management Systems is devoted to delivering paperless solutions in the warehouse, specializing in Voice-Directed Warehousing

Toronto, Canada – Mar-Kov Computer Systems Inc has announced that it is launching a new website to promote Chameleon Warehouse Management Systems, it's solution for paperless warehousing and voice-directed warehousing.

Chameleon Warehouse Management Systems provide warehousing with voice-directed picking, put-away, replenishment, and truck-loading.

In implementing Chameleon, Mar-Kov brings a wealth of experience from regulated industries such as Pharmaceuticals and Cosmetics with highly recognizable clients including Johnson and Johnson, Chanel, Actavis, Sanofi-Aventis, and Mastertaste.

The kind of accountability long required of software by companies in these industries is increasingly being required of companies in food and beverage processing and warehousing. Forward-looking companies are already moving to secure their supply chain with complete lot tracking and traceability.

Mar-Kov's Chameleon provides immediate benefits to clients, including:

- Complete traceability of all materials and operations
- Total paperless operation in the warehouse
- Voice-directed picking, put-away, shipping, and replenishment
- Barcode-enabled functionality throughout
